Base data was derived from USGS 1:25000 scale Digital Line Graphs, as stored in the GRANIT database. All base data was derived by Computer Systems Research Center, Durham, NH. Some new or old features added by FHPRC with DDP. For more details, please refer to the 1995. Base data was derived by the Bedford Land Trust, Bedford, NH, and the City and Citizens of the Regional Environmental Planning Program.

Digital data in NH GRANIT represent the efforts of the contributing agencies to model information from the field or source materials. Computer Systems Research Center (FHPRC) under contract to the Office of the Planning (OPP) and in consultation with cooperating agencies, maintains a continuing program to identify and correct errors in the data. Further OPP or FHPRC make corrections to the reliability or availability of the digital data.
